PROFESSIONAL SUMMARY

Highly motivated Computer Science Engineering graduate with expertise in Full Stack Development and AI-driven application development. Proficient in building scalable, efficient, and user-centric systems using Python and modern web technologies. Passionate about leveraging Artificial Intelligence and automation to solve complex real-world problems, with a strong focus on developing innovative, high-impact applications and continuously advancing technical expertise in the evolving AI landscape.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Angular.js
Backend: Python, Flask, Django, FastAPI
Database: MySQL, MongoDB
Tools & Technologies: REST APIs, Git, GitHub, Linux
Cloud: AWS EC2 (Application Deployment)
AI/ML: Machine Learning, Deep Learning, Natural Language Processing (NLP), OpenCV

INTERNSHIP EXPERIENCE

Web Development Intern – Ediglobe
Sep 2025 – Nov 2025
• Developed full-stack modules using Python and MySQL with proper database integration
• Built responsive UI components and improved user interaction
• Debugged and optimized application performance for better efficiency
• Worked in real-time development environment with production workflows

PROJECTS

AI Face Recognition Attendance System
GitHub: https://github.com/MunugalaVamshi/AI-Face-Recognition-Attendance-System
Tech Stack: Python, OpenCV, NumPy, Face Recognition, Flask
• Developed an AI-based real-time attendance system using OpenCV and face recognition algorithms (face detection, feature extraction, classification)
• Implemented face encoding and matching to accurately identify individuals
• Handled real-world challenges like lighting variations, multiple faces, and pose differences

• Optimized system for faster recognition and reduced latency
• Time Complexity: Face detection O(n) per frame, face matching O(n) based on dataset size

Jarvis AI Assistant (Desktop AI OS Assistant)
🔗 GitHub: https://github.com/MunugalaVamshi/Jarvis-AI-Assistant
Tech Stack: Python, SpeechRecognition, NLP, APIs, Automation, GenAI
• Developed an AI-powered desktop assistant inspired by Alexa and Google Assistant for real-world automation
• Implemented voice-controlled interaction using speech recognition for hands-free communication
• Enabled intelligent automation for tasks like calling, messaging, cab booking, and ticket reservations
• Integrated auto-learning and auto-upgrading capabilities for continuous improvement and scalability
• Built multi-device connectivity with system-level controls for OS-level functionality
• Optimized performance to reduce latency and improve efficiency in real-time operations

---

EDUCATION

B.Tech in Computer Science Engineering
Scient Institute of Technology
2022 – Present
Intermediate (10+2
Srigayatri Junior College
SSC
Hyderabad Sainik School

STRENGTHS

• Quick Learner and Self-Motivated
• Strong Problem-Solving Skills
• Good Communication and Teamwork
• Passion for Real-World Development
